

Achieving Competence Today (ACT) Team Presentations

March 4, 2008; 1:00 – 4:00 PM; Acuff Auditorium

Achieving Competence Today quality improvement curriculum was originally developed by Dr. Gordon Moore of Partnerships for Quality Education, with grant funding provided by The Robert Wood Johnson Foundation. Over a period of several years, the program evolved from a computer-based QI curriculum for medical residents to a broader interprofessional learning experience about improvement. University of Missouri is one of seven academic health centers that have received an additional two years of funding from the Robert Wood Johnson Foundation to develop this work into a team-based interprofessional experience in improvement.
